TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1974

Number 1

	Page English	Page Russian
PART 1 TELECOMMUNICATIONS Volume 28		
TELEVISION		
M.I. Krivosheyev and V.A. Shamshin: Trends in the Development of Television Transmission Networks	1	1
M.M. Kozlovskiy: Amplitude Distortion of a Television Transmitter	5	8
L.A. Seval'nyev: The Transmission of a Combination TV Signal Through an FM Radio Channel	10	13
D.P. Brilliantov: Analysis of the Joint Operation of a Damping Diode and a Transistor in a Horizontal Sweep Generator	14	16
MULTICHANNEL WIRE COMMUNICATIONS		
Yu.S. Milevskiy and A.V. Lebedev: Experience with the K-300 System	17	20
DATA TRANSMISSION		
A.K. Grabovskiy and V.A. Grebennikov: Error Probability when Multiplexing VF Channels of PCM Systems	21	25
A.B. Pugach, Ya.A. Rakhlin, I.Z. D'yakova and N.A. Berkman: Noise Immunity of DPSK Data Transmission Systems to Additive Noise	27	33
AUTOMATIC SWITCHING AND TELEPHONY		
Yu.N. Kornyshev: Repeated Calls in Toll Communications	29	35
G.A. Yefimov: Finder Monitoring in the Peripheral Control Circuits of a Quasi-Electronic Office (QEO)	35	41
P.I. Zhuk: Relative Handling Capacity of Individual Instruments with Sliding Repairable Stand-By	39	46
Yu.S. Rysin: Noise Characteristics of the Type DShI-100 Decade-Step Selectors	41	48
POWER SUPPLIES		
N.N. Smirnov and E.M. Korchagova: Principles of the Electric Power Supply of Agency's Dial Telephone Exchanges (PBX)	43	51
TELEPHONE TECHNIQUES		
V.E. Bukhviner, E.E. Dobrovol'skiy and M.M. Rozhkov: Controlled Companding of Speech Signals in Radiotelephony	47	57

	Page English	Russian
R.D. Leites and V.N. Sobolev: The Influence of Phase Effect on the Aural Perception of Synthesized Speech	50	62
E.V. Zelyakh and V.V. Krukhmalev: A Method of Compressing the Spectrum of a Speech Signal	54	65
I.A. Kozhukhovskaya: Determination of the Optimal Signal Parameters of Vocoder Systems with Band Analyzers	57	69

PART 2
RADIO ENGINEERING
Volume 29

V.A. Gubanov: Application of Ultrasonic Surface Waves in Radio Engineering Systems	60	1
M.S. Areshev and N.I. Kalashnikov: Mean Probability of Illumination of a Ground Station Fixed Antenna by a System of Circular Unphased Satellites	64	6
I.M. Pyshkin: Incoherent Reception of Digital Data in the Presence of Non-Gaussian Noise. Part II	66	10
I.Ya. Gol'dbaum: Calculation of the Expected Efficiency of Correcting Codes Matched with an SW Channel	72	18
A.E. Znamenskiy and E.D. Lotkova: Application of Chebyshev Fractions for Synthesizing Coupled Tuned Circuit Filters	75	22
E.I. Churkin: The Action of Real Random Processes on a Modified Phase-Lock AFC System	78	26
G.A. Yerokhin, V.G. Kocherzhevskiy and V.G. Gofman: Bends in Surface-Wave Lines	81	29
L.R. Yavich: Synthesis of Two-Section Power Dividers	86	36
V.A. Malyshev and E.P. Moskalenko: Synthesis of Two-Resonator Microwave Filters	90	41
I.N. Bobrov and P.T. Piskov: Threshold Sensitivity of a Radio Meter with a Single-Tank Parametric Amplifier in the Input	96	49
A.N. Bruyevich: Calculation of the Secondary Harmonic Voltages in a Selective System	100	54
Yu.N. Erofeyev: Buildup of the Length of the Pulses Produced by a Delayed Relaxation Oscillator	106	62
Nguen Tkhi Tu Lan: The Three-Signal Selectivity of the Input Circuit of a Tunnel-Diode Receiver	110	67
M.K. Belkin, B.K. Gostkin and V.G. Lozovik: Optimization of the Shape of the Pumping Voltage in a Low-Frequency Parametric Amplifier	113	71
B.V. Kazakov: Relaxation Oscillators with an Emitter Timing Section	116	75
K.P. Polov: Investigation of the Stability of an Amplifier Operating in Class D with Feedback	119	79
V.S. Sperenkov and S.A. Fedotov: Composite Transistors Consisting of Any Number of Ordinary Transistors	122	87

BRIEF COMMUNICATIONS

V.I. Chaikovskiy: Features of the Analysis of the Spectra of Electrical Signals of Finite Extension	128	94
M.I. Beloglazov: Conditions for Matching a Specified Selectivity with Minimum Phase Instability in Tuned LC-Amplifiers	129	95
V.B. Bespalov: The Scattering Parameters of a Transistor and the Microwave Noise Factor of a Transistor Amplifier	130	96
V.Ya. Kontorovich: Calculation of the Error Probability in Markov Channels with Fading	132	98

Number 2

	Page English	Russian
PART 1		
TELECOMMUNICATIONS		
Volume 28		
COMMUNICATIONS LINES		
I.I. Grodnev, K.G. Levinov and D.Ya. Gal'perovich: Superconducting Communications Cables	1	1
V.I. Kamalyagin, A.A. Kashutin, R.M. Lakernik and A.Yu. Tsym: Screening of the Quads of a Balanced Cable for the IDM-120 System	6	8
RADIO BROADCASTING		
S.P. Belousov and V.D. Kuznetsov: Calculation of the Field Strength of Medium Wave Stations at Great Distances	9	16
S.E. Bogdanov and S.S. Gorskiy: A Method of Combining the Power of Transmitters in the Decimeter Wave Band	14	22
TRUNK RADIO COMMUNICATIONS		
E.M. Gaspar'yants: Short-Wave Radio Link Operation Under Quiet and Disturbed Ionospheric Conditions	18	26
A.D. Taranenko and Yu.N. Eremin: A Circuit for Measuring the Mean Field Strength of SW Radio Station Signals	23	31
ANTENNA-FEEDER DEVICES		
V.Ya. Kleyev, O.I. Sergeyev and E.A. Khmel'nitskiy: Study of the Radiation Patterns of SW Receiving Antennas on a Section Corresponding to Low Angles of Arrival	25	34
N.N. Borisov and O.P. Frolov: Alignment of Antennas Operating on Tropospheric Links	29	40
V.G. Volkov, Yu.V. Lyakhov, V.V. Semenov and N.A. Semenov: Parameters of a Surface-Wave Line for a High-Power Antenna Feeder	31	42
COMPONENTS AND CIRCUITS IN COMMUNICATIONS TECHNIQUE		
M.N. Stoyanov and A.Z. Burakovskiy: Magnetic Temperature-Controlled Components in Communications Circuits	33	45
A.N. Ignatov and G.A. Serova: A Low-Noise Microphone Amplifier	36	48
V.V. Zimin: A Method of Multiplying the Frequency of a Sinusoidal Signal 2^n times	38	50
CIRCUIT AND FILTER THEORY		
V.V. Krymkin: Ultralow-Frequency Active RC Filters with Polynomial Characteristics	40	52
P.M. Todorov and V.G. Rachev: Four-Element M-Derived Band-Pass Filters	43	56
V.I. Kapustyan: Stability of a Distributed-Lumped-Active RC Network	51	68
Measuring Equipment	53	70
PART 2		
RADIO ENGINEERING		
Volume 29		
N.I. Kalachnikov and A.P. Stepanov: Calculation of Radio Interference with Amplitude and Angle Modulation in Multichannel FM Communications Systems	59	1

	Page English	Russian
F.F. Yurlov: The Technical-Economic Efficiency of Data Transmission Systems	64	8
L.E. Varakin: The Number of Code Sequences with a Given Number of Blocks	67	12
A.P. Podimov, G.V. Stogov and V.K. Kulchitsky: Representation of Modulated Signals in a Generalized Basis	69	15
G.V. Dubovskiy and S.I. Evtyanov: Transient Characteristics of Delay Lines Consisting of m-Type Filters	72	19
A.L. Kosova: The Energy Characteristics of Phase-Shift Keyed Signals at the Output of Devices with a Complex Nonlinearity	77	26
B.N. Dobzhinskiy: Monotonicity and Nonmonotonicity Conditions for Transients in Linear Systems	83	34
V.P. Bandukov and A.M. Pokras: Some Results of a Study of Two-Mirror Antennas with Modified Mirror Surfaces	86	38
G.I. Tuzov and V.V. Spirin: Dynamics of a Tracking Receiver of a Wideband Pseudorandom Signal with Discrete Frequency Modulation	92	46
M.E. Gertsenshtein, E.A. Gladkova, V.P. Magnushevskiy, V.S. Rosanov and L.G. Solovei: Optimization of the Correcting Networks of a Parametric Amplifier Using a Computer	96	52
E.F. Korolev: An Analytical Expression for the Components of the Electromagnetic Field of a Magnetic Head by the Huygens-Kirchhoff Method	99	57
Yu.V. Varlygo and N.K. Ivanov-Esipovich: Design of a Thermistor Inductive Analog for Microcircuits	106	67
BRIEF COMMUNICATION		
K.K. Lyapin, V.A. Polyanskiy and I.F. Shishkin: Selection of Targets in the Presence of Reflections from the Sea	111	76
N.I. Smirnov and L.Yu. Mogilevskiy: Effect of the Amplitude-Frequency Characteristic of an IF Amplifier on the Noise Power of a Correlation Receiver	112	77
B.Yu. Kapilevich: Optimum Matching of Nonreciprocal Reactive Microwave Four-Terminal Networks	113	79
S.K. Savin: The Approximation of Graphically Specified Functions	115	82
E.V. Zelyakh: A Method for Converting a Balanced Circuit into an Unbalanced Circuit	117	85
S.V. Pervachev and V.P. Sizov: The Filtering and Threshold Properties of a Phase-Locked AFC Loop Containing an Additional Phase Modulator	119	87
S.V. Kozin: Differential Equation of a Tuned Circuit Containing a Nonlinear Capacitance	121	90
M.S. Katsenbogen: Optimum Choice of the Third Threshold for a Truncated Sequential Procedure	123	93
O.P. Frolov: Determination of the Nature of the Excitation of the Troposcatter Volume from Instantaneous Radiation Patterns of Troposcatter Antennas	124	94
V.N. Plakhotnikov: The Operation of a Nonlinear Tracking Parameter-Measuring Radar Under Conditions of Disrupted Data Flow	126	96
V.I. Startsev: An Electrometer Amplifier with a Wide Dynamic Range	128	99

Number 3

PART 1
TELECOMMUNICATIONS
Volume 28

COMMUNICATION SYSTEMS AND NETWORKS

N.I. Krasnosel'skiy: OASU "Svyaz" — A Ramified Automatic System for the Control of Economic Communications	1	1
S.M. Kuleshov: Prediction and Calculation of Flows of Interurban Traffic	5	6
N.I. Kurnosova and A.P. Pshenichnikov: The Choice of the Structure of Within-Center Interexchange Connections of the Urban Telephone Network	8	10
M.M. Egunov and G.A. Fomin: The Structural Reliability of Versions of the Distribution of Direct Channels in a Communications Network	13	15

	Page English	Page Russian
AUTOMATIC SWITCHING AND TELEPHONY		
B.S. Livshits and I. Kh. Movshovich: Improvement of ATSK Urban Crossbar Automatic Telephone Exchanges	15	17
I.E. Golubtsov, G.L. Grigor'ev and Z.A. Kovaleva: Improvement of the System of Connecting Decade-Step Automatic Telephone Exchanges with Special Services	21	24
I.A. Bavrin, V.A. Bolotin and V.A. Sorokov: Determination of the Computed Allowances on Telephone Loading	24	27
MULTICHANNEL RADIO COMMUNICATIONS		
I.A. Gusyatinskiy and Yu.N. Margolin: The Tracking Heterodyne — a Circuit for Reducing FM Receiver Threshold Level	26	29
M.A. Bykhovskiy: Noise Immunity of Digital Data Reception in Multichannel Systems with Frequency Multiplexing and Delta Modulation	30	34
G.A. Greibo, Yu.P. Kulikov, L.N. Kopnichev, and A.N. Kurochkin: Estimation of Data Transmission Quality in Radio Link Channels	34	39
TELEVISION		
A.N. Isayev: Standardization of the Basic Parameters of a Color Television Broadcasting Systems	37	44
V.I. Shchurskiy: Differential Phase Distortion in the Transmission of a Television Signal Over Two Channels in Parallel	39	51
A.S. Astashkevich, G.S. Knel and A.K. Oksman: Improved Equipment for Television Stations of the K-1920 System	42	55
CONTROL AND MEASUREMENTS IN COMMUNICATIONS TECHNIQUE		
V.F. Kisorzhevskiy: A Signal-to-Noise Ratio Monitoring Circuit for Digital Channels	45	58
S.G. Plaksyuk: Measurement of Hum in a Video Channel	48	61
S.K. Sergeichuk: Cooperation of Member Countries of the Council for Mutual Economic Aid (CMEA) in the Field of Communications	50	64
N.N. Etrukhin and T.M. Malishevskaya: Communications Facilities of the Ryad Unified Computer System	53	68
PART 2 RADIO ENGINEERING Volume 29		
V.M. Rozov: Noise Immunity of an AM Multichannel Pilot System with Fixed Group Signal Power	59	1
V.V. Klyaznik and V.S. Kuz'kin: The Possibility of Reducing the Number of Quantization Levels by Randomization	64	8
V.V. Serov: Noise Immunity of Coherent Methods of Wide-Band Digital Data Transmission and Reception in a Channel with Variable Parameters	69	14
M.A. Shevchuk: Quantization of the Pulse Response of a Digital-Analog Matched Filter	72	19
S.M. Gol'din: The Conversion of Two Harmonic Signals by a Circuit with a Complex Nonlinearity	77	26
A.A. Gorbachev, V.A. Guseva and Ya.G. Rodionov: Action of an Amplitude-Modulated Signal and Pulse Noise on a Parametrically Excited Circuit	84	36
L.I. Chikunov: Determination of the Odd Part of a Positive Real Function from a Given Even Part	87	41
P.V. Belov and N.E. Kirillov: Spatial Correlation of Signals in a Multipath Channel with Fluctuating Parameters	91	45
Kh.D. Shinev and N.I. Dodov: Determination of Radiation from a Metallic Dipole Excited by a Surface Wave	96	52
I.M. Krikunova: Stability of a Nonlinear System for Tuning an Automatic Antenna Matching Device	100	58

	Page English	Page Russian
K.A. Tatsis: Signal Level Oscillations in the Reception of Television Programs Beyond the Radio Horizon	104	63
G.K. Galimov: Bifocal Two-Mirror Antennas	105	64
F.F. Mende, N.N. Prentslau, V.A. Charkin and I.T. Baranov: Highly Stable Microwave Oscillator for the 3-cm Band	111	71
B.I. Kuz'min: Construction of Short-Wave Receivers of Discrete Radio Signals with an Active Interval for Compensating Time-Concentrated Noise	113	74
V.V. Gabarev, M.A. Panova and I.M. Shmerlin: The Apparatus Errors of One-Dimensional Probability Density Analyzers	117	80
V.I. Sementsov: The Problem of Synthesizing Thin-Film Circuits with Minimum Inductive Pickup	121	85
Ch.I. Khusainov and E.M. Romash: A Pulsed D-C Voltage Regulator with a High Switching Frequency of the Control Transistor	123	88

Number 4

PART 1
TELECOMMUNICATIONS
Volume 28

MULTICHANNEL RADIO COMMUNICATIONS

I.V. Loginov and V.G. Yampol'skiy: Use of Periscope Antennas in Two-Frequency Radio-Relay Stations	1	1
V.I. Danilov and L.V. Vasenkova: Choice of Compatible Communications Channels on the Basis of Intermodulation Interference	7	10

DATA TRANSMISSION

K.A. Sil'vinskaya, T.A. Vladimirova, and N.A. Kurenkova: Range of Data Transmission at Speeds of up to 2400 Baud	10	12
A.A. Amosov, N.A. Aleksandrov and N.B. Zeliger: An Algorithm for Improving the Fidelity of Data Exchange between Computer Centers	15	19
B.N. Myastsov, D.A. Berkovich, A.Yu. Lev, and D.A. Tsirel'son: An Automatic Frequency Response Correcting Network for Standard VF Channels	20	26

TELEGRAPHY AND FACSIMILE

O.V. Kulikovskiy: Differential PCM Facsimile Transmission	25	33
V.S. Mikhailenko, V.E. P'yuk and D.G. Vorob'yev: FM Facsimile Transmission Over Urban and Rural Network Channels	30	38
M.I. Mushkat: Influence of the Blocking Circuits in FSK VF Telegraph Receivers on Digital Data Transmission Fidelity	35	46
M.N. Aripov and M.M. Kapustyanov: Statistical Characteristics of Packets of Splitting Pulses	36	47

POWER SUPPLIES

D.N. Prokhovnik and A.A. Arakelov: Improvement of Transient Behavior in the Type UGP-24 Guaranteed Supply Circuits	38	50
O.L. Luk'yanova: Characteristics of the Utilization of the Radio-Frequency Spectrum by a Particular System	41	57
E.V. Demina: Development of a Multichannel Communications Line from the Point of View of Optimum Planning	45	62

GENERATION, CONVERSION AND AMPLIFICATION OF SIGNALS

L.T. Kim: A Transistor Modulator with a Trapezoidal and a Rectangular Carrier	48	71
G.N. Andreyev and M.V. Kapranov: Frequency Characteristics of a Tuned Amplifier with Automatic Phase Control	53	72

	Page English	Russian
PART 2 RADIO ENGINEERING Volume 29		
V.A. Fedorchenko: Radar Resolution of Pulsed Signals	59	6
Yu.G. Tratas: Estimate of the Noise Immunity of Systems for Transmitting a Markov Parameter by Employing Time Forms of Rectangular RF Pulse Modulation	65	13
B.S. Gol'dberg and G.V. Konovalov: The Out-of-Band Radiation Power of Certain Forms of RF Signals	68	18
A.M. Mishin: Estimation of Parameters of a Harmonic Interference from the Response of a Digital Filter	73	24
T.B. Borukaev and A.A. Spektor: An Analytical Method for Investigating Nonlinear, Narrowband Circuits	77	30
Yu.V. Kalinin: Computation of the Power of Nonlinear Interference at the Output of a Delayless Nonlinear Device	81	35
I.V. Sukhodoyev: Noise Parameters of Circuits for Distributed Power Transmission	84	39
I. Dodov and Khr. Shinev: Radiation from a Dipole Antenna Array Energized by a Surface Wave	91	48
R.V. Gurevich and G.A. Kliger: Feeder Tuning Using Series Transformers	95	54
B.P. Filimonov: A Tuneable Low-Frequency RC Oscillator	99	59
V.P. Dolgin: A Transistor RC-Oscillator	102	63
V.M. Itskovich: Analysis of Multistage Broadband Amplifiers	105	67
Yu.V. Skalin: Influence of Magnetic Recording Channel Parameters on the Shape of FM-Recorded Phototelevision Signals	108	72
S.A. Fedotov: Determination of the Parameters of a Cascade Connection of Multiterminal Networks	111	76
A.M. Kuznetsova: A Practical Method of Designing Multicylinder Microwave Resonators	114	79
BRIEF COMMUNICATIONS		
B.V. Davydov: Digital Discrimination of Phase-Shift Keyed Signals	118	85
N.N. Tetekin and E.G. Nazarenko: Calculation of the Parameters of the Energy Spectrum from Wide-Band Measurements	119	87
A.F. Poplavskaya, M.S. Trizno, A.A. Stepanov and N.A. Poplavskiy: Hermetic Sealing of KLS Capacitors	120	88
G.M. Kaverina, Yu.A. Kleshnev, V.I. Nikitin, G.F. Sirotin, and G.K. Ul'yanov: Ultrasonic Surface-Wave Piezoelectric Filters for Television Receivers	121	90
V.V. Kobzev and A.G. Trusov: The FM Subcarrier in Broadband Optical Data-Transmission Systems	122	91
V.S. Khmel'nitskiy: Determination of the Transient Time in an Idealized PAFC System	124	93
D.B. Sverdlov: Computer Investigation of a Nonlinear Delayless System with Random Characteristics	125	94
V.N. Kovalev: Compensation of the Frequency Characteristic of a Common Emitter-Common Base Cascode Amplifier	127	97
E.M. Antoshchenko and A.D. Ignatenko: The Transient Response of a Tube DC Amplifier in the Large-Time Region	128	
S.E. London and S.V. Tomashevich: Line Transformers with Fractional Transformation Factor	129	100
FOR THE ENGINEER		
V.N. Golubev: Matching the Neighboring-Channel Dynamic Range to the Single-Signal Selectivity Characteristic of a Radio Receiver	130	102
V.A. Bondar and G.I. Peredel'skiy: Linearly Varying Voltage Generators with Independent Nonlinearity Compensation	131	103

Number 5

	Page English	Page Russian
PART 1 TELECOMMUNICATIONS Volume 28		
MULTICHANNEL RADIO COMMUNICATIONS		
I.V. Loginov and V.G. Yampol'skiy: The Use of Periscopic Antennas on Reconstructed Radio Relay Links	1	20
L.Ya. Kantor: Selectivity of an Ideal Tracking Demodulator of FM Signals with Overlapping Spectra	5	26
TELEVISION		
N.A. Reushkin: Optimization of the Parameters of a Trunk-Line for a Cable Television System	10	31
V.P. Dvorkovich: Measurement of the Frequency Characteristics of Television Channels	14	36
E.V. Babkin: Nomenclature of Television Test Signals	18	41
DATA TRANSMISSION		
L.G. Azarov, I.E. Baidan, A.I. Boyarskiy, A.Yu. Lev, L.M. Rakhovich, R.S. Ratchkauskas and I.E. Shpigel: A Modem for Data Transmission over a Primary Channel	22	45
V.P. Nekrasov: Reliability of the Urban Telephone Network Cable Lines	26	49
V.M. Dmitrachenko, A.I. Kozelev and O.V. Mel'nikova: The Phase-Frequency Characteristic of a Waveguide Communications Line	32	55
CONTROL AND MEASUREMENTS IN COMMUNICATIONS TECHNIQUES		
A.I. Zudakin and A.P. Pavlyuk: Principles of the Standardization and Measurement of the Spectral Parameters of the Emissions of Radio Transmitters	35	57
R.M. Khrennikova; Measurement of Parasitic AM in HF Equipment	39	62
A.V. Demchuk: A Phase Calibrator	42	64
A.A. Golovkov: Synthesis of Matching Circuits and Filters with Distributed and Lumped Elements	43	67
PART 2 RADIO ENGINEERING Volume 29		
A.L. Mikaelyan and V.I. Bobrinev: Holographic Memory Systems	47	7
B.S. Mush: Probability Estimate of the Error of Correcting Signal Phase by Digital Methods	57	24
M.N. Aripov and Sh.Z. Yunusov: Investigation of the Operating Efficiency of a System with "Five-Element Tor" Type Erasure	61	28
R.P. Poilov: Design of Narrow-Band Quasi-Polynomial Filters with Given Effective Parameters	64	33
B.A. Shvarts and A.M. Kaganskiy: The Near Field of Loop Antennas of Inductive Coupling and the Required Spacing Between Transmitting Antennas Operating in a Common Frequency Channel	68	38
S.A. Savel'yev and O.A. Chelnokov: Stability of the Stationary States of a High-Frequency Transistor Oscillator	74	46
B.A. Stryukov and Yu.M. Zverev: The Effect of Phase Regeneration and Its Use for FM Signal Reception	81	55
V.A. Vlasenko, B.I. Davydov and Yi.K. Filipskiy: Dynamic Characteristics of Tuned Frequency Detectors	85	60
V.A. Raikhlin: Homogeneous Artificial Delay Lines as Shaping Lines	89	64
K.K. Gomoyunov: Total Feedback in an Amplifier Stage	94	70
V.E. Kitayev and G.G. Batanova: Stability of a Transistor Stabilizer	95	72
S.F. Sikolenko and A.P. Sirotkin: Dependence of the Static Gain of a Field-Effect Transistor on Its Operating Conditions	98	76

	Page English	Russian
BRIEF COMMUNICATIONS		
R. M. Turkel'taub: The Spectrum of a Coherent Sequence of Stochastic Pulses	101	79
L. F. Tarkanovskiy: The Accuracy of Voltage Transformation Linearization in a Time Interval	102	81
A. A. Sokolov, I. A. Lobkov and B. N. Vasilyev: Topological Analysis of Networks with Operational Amplifiers	104	83
O. L. Sokolov: Noise Immunity of a Detector, Which Analyzes the Difference in Fluctuation Overshoots of Additive Noise at Polar Levels	105	84
V. D. Frolkin: Dynamic Range of a HF Amplifier Acted upon by Two Signals	107	87
A. L. Kosova: Noise Immunity of a Communication System with Phase-Shift Keying in the Presence of a Complex Nonlinearity	109	89
A. M. Ivanitskiy: Generalization of Tellegen's Theorem	111	92
FOR THE ENGINEER		
A. A. Pryadilova: A High-Speed Flip-Flop with a High Noise Immunity	114	95
Yu. V. Zavrazhnov and M. G. Fedotov: Temperature Stabilization of the Linear Operation of a Transistor Amplifier	115	96
M. G. Vitkov: A Conditionally Linear Theory of High-Q Inductive Coils with Cores Without Eddy Currents	118	100
E. A. Volkov: Analysis of a Harmonic Two-to-One Frequency Divider	121	104

COMMUNICATIONS SYSTEMS AND NETWORKS		
G. P. Divnogortsev: Methods of Constructing a State Data Transmission Network	1	7
E. K. Iodko and Yu. D. Umrikhim: Losses in Communications Systems with Limited Reliability and Carrying Capacity	5	13
AUTOMATIC SWITCHING AND TELEPHONY		
M. N. Goncharok: incoming Stage of Register Search for the ATSK-U	10	19
M. A. Sapozhkov: Noticeable Levels of Amplitude-Frequency Distortion of Speech	14	23
MULTICHANNEL WIRE COMMUNICATIONS		
S. M. Broidi and M. P. Perel'man: Servicing System with Variable Structure for Tone Frequency Channels	16	26
A. I. Borisov and V. I. Kulikova: Estimate of the Nonlinear Characteristics of Transistors for the Amplifiers of HF Transmission Systems	22	32
RADIO BROADCASTING		
V. G. Buryak: Controlling the Coupling to the Load of Short-Wave High-Power Transmitters	26	39
B. B. Shtein: Higher Harmonics in Transmitters with Plate and Automatic Plate Modulation	34	49
L. Z. Papernov and M. A. Khazanova: Logarithmic Transformation of Audio-Frequency Signals	41	55
ANTENNA-FEEDER DEVICES		
S. P. Belousov, V. D. Kuznetsov, L. S. Kazanskiy and A. N. Nechayev: Simultaneous Operation of Two High-Power Short-Wave Transmitters into a Common Antenna	45	60
A. M. Model and V. M. Antonenko: A Filter for Combining the Video and Accompanying Sound Television Signals in the Decimeter Wave Band	48	63

	Page English	Page Russian
CIRCUIT THEORY		
E.V. Zelyakh: Balanced and Unbalanced Circuits Engineering Aspects of the Theory	51	66
A.F. Beletskiy, Yu.M. Gromov and A.T. Lebedev: Multipole Matching Filters and Their Synthesis	54	70
V.N. Loveiko and M.Z. Chapovskii: Synthesis of Phase-Shift Circuits Using Active RC-Networks of the Minimum-Phase Type	58	75
PART 2 RADIO ENGINEERING Volume 29		
V.P. Ukharskiy and N.V. Chetyrikin: A Class of Complex Nonlinear Radio Devices	63	1
S.S. Bak and Yu.G. Levchanko: Construction of a High-Speed Communication System for a Multibeam Channel	66	4
V.N. Kudashov: Power Characteristics of HF Frequency-Multiplexed Signals at the Output of a Traveling Wave Tube	70	10
L.E. Varakin: Real Noise Immunity of Automatic Tracking Systems with Quartz Delay Lines	76	16
L.I. Volgin: Integrating and Differentiating Devices with Impedance Converters	78	19
S.S. Petrosyan: The Gradient of the Frequency Characteristics of a Digital Filter	82	23
Yu.A. Manteyfel: Damping of Oscillatory Systems	85	27
I.M. Simontov: A Generalized Analysis of the Nonlinear Properties of Four-Terminal Networks	88	31
Ya.G. Rodionov: Approximate Estimate of the Probability of a Phase Increase in the Nonlinear System of a Tracking Filter in the Presence of Random Noise	92	36
A.V. Pyzhikov: Signal-to-Noise Ratio at the Output of an Integrating-Differentiating RC Circuit	96	40
V.V. Kozlovskiy: An Approximate Method of Synthesizing Short-Circuited Line Segments Based on the Input Impedance	99	51
K.A. Samoilo and T.S. Fedosova: Analysis of a Phase-Locked Loop by Nonlinear Transformation of the Variables	102	55
V.V. Zimin: Frequency Multiplication by Devices with Periodic Current-Voltage Characteristics	106	60
O.F. Bokk, E.B. Gribov and V.P. Chernolikhova: Dynamic Range of the Transistor Stages of a Radio Receiver: Part I. High-Frequency Bipolar Transistor Amplifiers	110	65
A.V. Zen'kovich: A Method of Reducing the Effect of Amplitude Changes in a Receiver of FSK and DFSK Signals	115	71
G.I. Levitan: Dynamic Detector Characteristics of Amplitude Detectors	117	73
I.S. Andronov and B.N. Snitko: Measurement of Frequency from the Zero Crossings of the Voltage	120	76
A.I. Goron: Effect of Partial Saturation of the Pole Pieces of a Recording Head on Its Field	123	80
I.I. Gurova: Emitter Self-Biasing as a Means of Equalizing the Operating Modes of Transistors	126	83
BRIEF COMMUNICATIONS		
G.S. Kondratenkov: The Signal Function of a Holographic Radar	131	90
M.Z. Chapovskiy and L.Z. Podol'skiy: A Method of Realizing Electrical Circuit Functions	133	93
I.V. Sitnyakovskiy and M.S. Shmilevich: Comparative Estimate of the Quantization Noise of Multilevel Delta-Modulation and PCM	135	95
Yu.G. Boltovskiy: Construction of a Signal Flow Graph From the Equivalent Circuit	137	95
V.A. Kolyuskin and D.V. Nezlin: Estimate of the Efficiency of Some Methods of Sector Scanning	138	99
A.R. Shvartsman: Computation of the Effective Selectivity of Radio Receivers	140	101
